Mr. Qian Decun  
Assistant Secretary General  
International Department Director  
China Children and Teenager's Fund

Dear Mr. Qian Decon:

On behalf of America's Development Foundation, I wish to express sympathy to the people of China suffering from the earthquake in Sichuan province. Also, I wish to express the commitment of America's Development Foundation to cooperate as the partner of China Children and Teenager's Fund in mobilizing resources for humanitarian assistance services for children and youth affected by the earthquake.

This major tragedy will require a tremendous amount of resources needed for emergency relief, rehabilitation and reconstruction activities. The agreement of our two organizations to work together will help maximize the amount of resources that can be mobilized in China and the United States for our "**China Earthquake Relief and Reconstruction Fund**" to provide relief, rehabilitation and reconstruction services to the children and youth affected by the earthquake in such areas as the following: emergency relief including food, shelter and medical care; orphaned and handicapped children care; post-disaster psychological counseling; reconstructing and building orphanages; and rehabilitation and reconstruction of schools in the disaster area.

Our two organizations have the experience, expertise and commitment to undertake this important work. The China's Children and Teenage Fund, established in 1981 as an independent charitable organization, has been engaged in supporting and implementing important children and youth education and welfare programs throughout China. It is a highly qualified and respected institution and contributions to this organization are tax-deductible in China. America's Development Foundation, established as a U.S. nonprofit organization in 1980, is well experienced implementing economic and social development programs in over thirty countries throughout the world, including China. It is also a highly qualified and respected institution and contributions to this organization are tax-deductible in the United States.

America's Development Foundation looks forward to working closely with the China Children and Teenager's Fund in successfully mobilizing resources for the China Earthquake Relief and Reconstruction Fund and the provision of humanitarian assistance services for children and youth affected by the earthquake.

Sincerely,

Michael Miller  
President
